

**INTRODUCTION :**

The information and instructions contained in this booklet apply to the following brand:

- **CONTACTA DAILY LENS Yal**

The Soft Contact Lens is daily wear contact lens prescribed for frequent replacement. They are different from the rigid contact as they are more soft and flexible.

Lens Properties:

Material	Water Content	Base Curve (BC)	Diameter (DIA)	UV blocking	Wearing Schedule
Filcon IV	58%	8.2 to 9.0 mm	13.8 to 14.4mm	Class II	1 day

Lens Parameter:

CONTACTA DAILY LENS Yal The light blue color will make it more visible. The Soft Contact Lens with UV blocking may block UV light slightly, but cannot protect eyes as the UV protection equipment.

Power:
 -0.25D to -6.00D (in 0.25D steps)
 -6.00D to -12.00D (in 0.50D steps)
 +0.25D to +6.00D (in 0.25D steps)
 +6.00D to +8.00D (in 0.50D steps)

Discard the lens if it becomes damaged or you reach the prescribed wearing time recommended by your eye care professional.

The information and instructions apply only to **Daily Wear Soft Contact Lens**. It is for your eye health, it is important to wear your lenses as prescribed by your eye care professional. It is also important to keep your eye care professional fully aware of your medical history. Your eye care professional will tailor a total program of care based on your specific needs.

He or she will review with you all instructions for how to use the lens properly. The safe and effectiveness of contact lenses depends on proper use.

WEARING RESTRICTIONS AND INDICATIONS :

The CONTACTA DAILY LENS Yal Contact Lens is indicated as daily wear and single-use soft contact lens for the correction of refractive astigmatia (myopia and hyperopia) in phakic or aphakic persons with non-diseased eyes who exhibit refractive astigmatism of 1.00D or less where the astigmatism does not interfere with visual acuity.

CONTRAINDICATIONS (REASONS NOT TO USE)

DO NOT USE Daily Wear Soft Contact Lenses when any of the following conditions exists:

- Acute or sub-acute inflammation or infection of the anterior chamber of the eye
- Any eye disease, injury or abnormality that affect the cornea, conjunctiva, or eyelids
- Severe insufficiency of lacrimal secretion (dry eye)
- Corneal hypoxia (reduced corneal sensitivity), if not-aphakic
- Any systemic disease that may affect the eye or be exacerbated by wearing contact lens
- Allergic reactions of ocular surface or adnexa that may be induced or exaggerated by the wearing of contact lenses or use of contact lens solutions
- Allergy to any ingredients such as mercury or Thimerosal, in a solution which is used to care for the **Daily Wear Soft Contact Lens**
- Any active corneal infection (bacterial, fungal, or viral)
- If eye become red or irritated

WARNINGS

INFECTION WITH POSSIBLE PERMANENT DAMAGE TO VISION COULD RESULT FROM THE FAILURE TO STRICTLY FOLLOW RECOMMENDED DIRECTIONS FOR USE. PROBLEMS WITH CONTACT LENSES COULD RESULT IN SERIOUS INJURY TO THE EYE. IT IS ESSENTIAL THAT YOU FOLLOW THE DIRECTIONS OF THE EYE CARE PROFESSIONAL AND ALL LABELING INSTRUCTIONS FOR PROPER USE OF CONTACT LENSES.

EYE PROBLEMS, INCLUDING CORNEAL ULCERS, CAN DEVELOP RAPIDLY AND LEAD TO LOSS OF VISION; IF YOU EXPERIENCE:

- Eye Discomfort
- Excessive Tearing
- Vision Changes
- Loss of Vision
- Eye Redness
- Or Other Eye Problems

YOU SHOULD BE INSTRUCTED TO IMMEDIATELY REMOVE THE LENSES, AND PROMPTLY CONTACT YOUR EYE CARE PROFESSIONAL.

- Daily wear lenses are not indicated for overnight wear, and you should be instructed not to wear lenses while sleeping.
- Please do not wear the contact lens continuously more than 12 hours.
- Always dispose of lenses when they are removed and have replacement lenses or glasses available.
- Consult the eye care professional regarding the use of contact lens in certain atmospheric or environmental conditions that can cause irritation to the eye.
- Consult the eye care professional or doctor if you are pregnant. According to personal physical condition, the diameter of cornea might have some change during pregnancy.
- Please note there are additional risks if you reuse of contact lens:
 - The chance of infection may increase and could lead to severe infection, vision loss or blindness.
 - You may experience blurred vision due to inappropriate cleaning of lens surface.
 - Lenses may become physically compromised by repeatedly removing and re-inserting lenses.
 - Do not reuse old solution left in your lens case since solution reuse reduces effective lens disinfection and could lead to severe infection, vision loss or blindness.
 - The lens is immersed in the packaging solution contains boric acid, to prevent microbiological contamination. If you reuse the lens, please talk to your doctor before wearing the contact lens as it contains boric acid.
 - Please flush it with clean saline solution before wearing the contact lens.
 - Borates, which include boric acid and sodium borate, are classified as Category IB CMR substances when their concentration exceeds 0.1% by weight. However, these compounds are deemed safe for application when used in compliance with the provided label directions.

PRECAUTIONS

Eye care professionals should carefully instruct you about the following care regimen and safety precautions:

- If the lens sticks (stops moving) on the eye, you should be instructed to **immediately** consult your eye care professional.
- Always wash and rinse hands before handling lenses. Avoid contaminating lenses with make-up, aerosol sprays or wearing them near noxious fumes. It is best to put on lenses before putting on makeup.
- Avoid to scratches the lenses, causing distorted vision and/or injury of the eye, especially with fingernails.
- Carefully follow the handling, insertion, removal, and wearing instructions in your Instructions for the **Daily Wear Soft Contact Lens** and those prescribed by the eye care professional.
- Never wear lenses beyond the period recommended by the eye care professional.
- The lens has been sterilized and sealed in packaging until open for use. Do not attempt to re-sterilize the lens in any condition, even if it is unopened or unused. Inappropriate sterilization or re-sterilization may cause package to leak or damage the lens, which may lead to cornea scratches, irritation, sense of foreign object, infection or other possible abnormal conditions when wearing the damaged lens.
- Avoid all harmful or irritating vapors and fumes while wearing lenses.
- Ask the eye care professional about wearing lenses during sporting activities.
- Never use tweezers or other tools to remove lenses from the lens container unless specifically indicated for that use. Pour the lens into the hand.
- Always contact the eye care professional before using any medicine in the eyes.
- Always inform the employer of being a contact lens wearer. Some jobs may require use of eye protection equipment or may require that you not wear contact lenses.
- As with any contact lens, follow-up visits are necessary to assure the continuing health of your eyes. You should be instructed as to a recommend follow-up schedule.
- Never to share the lens with other users.

ADVERSE REACTIONS (PROBLEM AND WHAT TO DO)

You should be informed that the following problems may occur:

- Eyes stinging, burning, itching (irritation), or other eye pain
- Comfort is less than when lens was first placed on eye
- Feeling that something is in the eye such as a foreign body or scratched area
- Excessive watering (tearing) of the eyes
- Unusual eye secretions
- Redness of the eyes
- Reduced sharpness of vision (poor visual acuity)
- Blurred vision, rainbows, halos around objects
- Sensitivity to light (photophobia)
- Dry eyes
- If you notice any of above, you should be instructed to:
 - **Immediately remove lenses.**
 - If the discomfort or problem stops, then look closely at the lens. If the lens is in any way damaged, Discard damaged lens. If you notice any problems, you should immediately remove your lens. If the problem or discomfort stops, discard the lens and place a new fresh lens on the eye.
 - If your lens has dis fit or foreign body on it, or the problem stops and the lens appears undamaged, you should thoroughly clean, rinse, and disinfect the lenses; then reinsert them. After reinsertion, if the problem continues, you should immediately remove the lenses and consult the eye care professional.

When any of the above problems occur, a serious condition such as infection, corneal ulcer, neovascularization, or iritis may be present. You should be instructed to **keep lens off the eye and seek immediate professional identification of the problem and prompt treatment to avoid serious eye damage.**

WEARING INSTRUCTION

The lens packages are individual and maintained sterily (Sterilized using steam).

DO NOT use if the sterile blister package is opened or damaged.

If the lens appears damaged or deformed, DO NOT use it and use the next lens in the multi-pack.

**1.Placing the Lens on the Eye**

- Wash and rinse your hands thoroughly and dry them thoroughly with a fiber-free towel, clean and dry before touching the lenses.
- Verify that the lens is not turned inside out by placing it on your forefinger and checking its profile. The lens should appear a natural, curved, bowl-like shape.
- Place the lens on the tip of the clean and dry right or left index finger. Place the middle finger of the same hand close to the lashes and pull the lower eyelid down.
- Use the fingers of the other hand to lift the upper eyelid.
- Place the lens directly on the eye (cornea) and gently spread your finger away from the lens.
- Look down and slowly release your lower eyelid.
- Look straight ahead and slowly release your upper eyelid.
- Blink gently. If any problems discover, remove your lenses immediately and contact your eye care professional.

2.Centering the Lens

If the lens is not centered on the eye, to center a lens as follow one of the procedures below.

- a.Close your eyelids and gently massage the lens into place through the closed lids.
- b.Use your fingers on the edge of the upper lid or lower lid and gently manipulate the off-centered lens onto the cornea while the eye is open.

3.Removing the Lens

Wash, rinse, and dry your hands thoroughly.

Caution: Always be sure the lens is on the cornea before attempting to remove it.

Simply follow the procedures recommended by the eye care professional.

- Pinch Method
- a.Look up; slide the lens to the lower part of the eye using the forefinger.
- b.Pinch the lens between the thumb and forefinger gently.
- c.Remove the lens.
- Remove the other lens by following the same procedure.
- The proper method for disposing of used contact lenses is to throw the lenses in the trash bin.

REPORTING OF ADVERSE REACTIONS (Side Effects)

Any serious incident experienced while wearing CONTACTA DAILY LENS Yal Contact Lenses should be reported to the manufacturer and/or its authorized representative and/or to your national authority.

It is essential that you follow your eye care professional's directions regarding this important step of building up your wear time.
